

Case ID: d1228967-89bf-49bf-8a7f-20fa67357af1

Timestamp: 2026-07-27 12:25:12

Account: ACC-MULE-R1

Report Type: INVESTIGATION

1. EXECUTIVE SUMMARY

MuleShield AI forensic audit flagged account ACC-MULE-R1 for suspicious layering activity. The account holds a balance of 25,000.00 INR with an anomaly threshold threat level of 85/100. Compliance filters triggered include: R2_HIGH_DAILY_VOLUME, R11_HIGH_VALUE_SWIFT_SMURFING.

2. SUSPICIOUS ACTIVITY NARRATIVE

Chronological analysis indicates an abnormal sequence of money transfers involving account ACC-MULE-R1. Immediately following initialization or dormancy reactivation, the account processed 2 transfers with high-speed rotation characteristics. Incoming and outgoing flows show direct structural loops indicative of transactional smurfing designed to layer assets and obscure final beneficiaries.

3. LEDGER EVIDENCE LISTING
